

the ArmRLite advantage

More than 60 years of manufacturing experience goes into each of our overhead sectional doors, resulting in a lasting reputation for quality, strength, and innovation.

There are enough variables on projects to begin with, worrying about delivery should not be a hassle. ArmRLite takes each order as a priority and we work hard provide our customers with on-time, hassle-free deliveries.

Welded aluminum frames offer unbeatable strength and endurance for even the harshest use. Our frames will not “sag” or loosen like our competitors’ bolted frames. We manufacture our aluminum doors with 4 sided extrusions, not the common 3 sided which can crumble under pressure. We build our doors to last.

Leading in industry innovation with our exclusive ArmRLite ADA compliant no step overpass door. Stable, secure, and safe public egress option for our aluminum sectional doors.

ArmRLite is a pioneer of customization. To that end, we can offer our customers unlimited glass options. We can offer the industry’s first 1" thick insulated glazing where others typically max out at ½". We can easily accommodate non-traditional opening sizes. Our Aluminum doors can be fabricated up to 30'-2" wide! For uneven floors, sloping bottom sections are available. Looking for the option to open the windows on a sectional door for some fresh air? Not a problem for ArmRLite; ask us about our push-out awning windows! For projects or building codes with specific requirements, ArmRLite offers NFRC rated doors and wind load ratings up to 180mph!

Lastly, the warranty a product has is indicative of its quality and value over time. ArmRLite offers an astounding 20-year structural warranty on our welded framed door, except top section when trolley operated. Our 20-year finish warranty, except on installations within 1 mile of saltwater, for both custom Kynar® and standard finishes also serves as a testament to the unparalleled quality and value of our doors.
